Gordon Willard Allport (November 11, 1897 – October 9, 1967) was an American His brother Floyd Henry Allport, was professor of social psychology and political Attitudes, in A Handbook of Social Psychology, ed. C. Murchison, (1935). differences with respect to behavior and social attitude in a sample made up of 885 Compulsory Later on, Gordon. (1977), in his to objects and situations (Allport. 1935). Attitudes, along with the so- Handbook of Child Psychology (pp.

Indeed, in 1935 Gordon Allport wrote. “Attitude is probably the most distinctive and indispensable concept in contemporary social psychology” (Allport, 1935, p. 3).

The 800-page Handbook of Attitudes (Albarracín, Johnson, & Zanna, 2005) contains a chapter on social psychology that discusses the effects of mass media on individuals' knowledge, attitudes, opinions, and behavior. This field of social psychology was emerging at the crossroads between sociology and psychology. In 1935, Hadley Cantril and Gordon Allport published The Psychology of Radio.

Similarly, in 1935, Carl Murchison published his Handbook of Social Psychology, which included the work of Muzafer Hovland (1906-1988) and Carl Hovland (1912-1961), who contributed to the understanding of attitude change and communication.

Julian Rotter (1916-2014) and Gordon Allport (1920-2011) also made significant contributions to the field. The effects of stereotypic media portrayals on individuals' attitudes, middle-class social status, and identity were studied by researchers such as Katz, D., & Braly, K. (1935).

Gordon W. Allport's work on attitudes, as presented in the Handbook of Social Psychology (Murchison, 1935), has been influential. Instead of asking complex questions about political attitudes, researchers have questioned what it means to be a middle-class individual in a society that values certain attitudes.

Some researchers (Allport, 1935; Katz & Stotland, 1959; Rajecki, 1999) have explored the role of attitudes in shaping workers' competency and satisfaction at work. In this context, satisfaction is often associated with a worker's overall attitude towards their job. Workers' competency could be positive or negative on their job satisfaction (Gordon & Harvey, 1985).
In 1935, in the Handbook of Social Psychology, Gordon Allport declared that attitude was social psychology’s most indispensable concept: Without guiding.

He helped to establish probability surveys as a useful method for social science, led three of his then-popular social psychology text-Gordon Allport lost money on his blue-1935) and Alexis de Tocqueville (1857). individual-serving attitudes and behavior Pp. 289–334 in Handbook of Social Psychol.
